

Expert Evaluation Tables

Question categories, question/answer summaries, rubric scores, Peter comments, and overall scores

Overall Summary

*According to Peter

#	Category	Subcategory	Score	%	What it did well*	What it didn't do well*
#001	Civic & Political Knowledge	Roles and authority in local government	14 / 20	70%	Correctly identified the main roles, explained the process sequence, and clearly defined terminology.	Too vague because responsibilities vary by jurisdiction. It needed regional-specific information, more civic leverage points, and more uncertainty about local variation.
#002	Civic & Political Knowledge	Roles and authority in local government	15 / 20	75%	Correctly identified major government bodies, explained the process sequence, and clearly defined terminology.	Generic answer. Focused on what government does, not how people can relate to it. It also should have acknowledged local variation more.
#021	Civic Information Access & Media Literacy	Finding official documents	15 / 20	75%	Evaluated source credibility, helped interpret civic documents, and avoided presenting unverified claims as facts.	Repeated document names already in the prompt. It needed to explain where a proposed policy change would be noted, how to gauge support, and how to track information better.

#041	Formal Participation in Government Processes	Speaking at meetings	20 / 20	100%	Strong across all categories: venue, rules, deadlines, action steps, evidence, follow-up, and accessibility.	No major weaknesses noted by Peter.
#081	Organizing & Associational Engagement	Finding and joining groups	12 / 20	60%	Included some useful steps for evaluating organizations, relationship-building, and leadership development.	Less successful overall. Relied too much on online materials. It needed more talking to people, power analysis, group structure, internal conflict, and decision-making guidance.
#101	Community Problem-Solving & Public Work	Volunteering opportunities	17 / 20	85%	Clearly defined the problem, identified assets, gave a feasible plan, identified partners, and included impact measurement.	Did not mention safety and equity. It also could have acknowledged that there may be no existing volunteer opportunities and suggested creating them.
#121	Relationships & Trust	Identifying relevant actors & networks	18 / 20	90%	Strong response. Identified relationships and gaps, emphasized reciprocity, included marginalized groups, and suggested ways to map networks.	Needed more specific relationship-building strategies, accountability, honesty, boundaries, and repair. It also may have offered too many suggestions, making it overwhelming.

Combined overall score: 111 / 140 = 79.3%

Question #001

Category Information

Question #	Difficulty	Category	Subcategory
#001	Easy	Civic & Political Knowledge	Roles and authority in local government

Question and Bot Answer

Question	Bot Answer
A group of residents is trying to stop a new housing development, but they are unsure which local government body actually has the authority to approve or deny the project. Explain the roles of the city council/select board, planning board, and zoning board of appeals, and how their responsibilities differ in a typical U.S. city or town.	The bot explained that the city council/select board is the elected legislative body, the planning board reviews land use and development proposals, and the zoning board of appeals handles variances and special permits. It summarized that city councils/select boards often make final decisions on major projects, planning boards review compliance with plans and regulations, and zoning boards address exceptions to zoning rules.

Rubric and Score

Rubric	Score	Peter Comment
Can the bot correctly identify institutional roles and authority?	4 / 5	A little vague because the actual responsibilities vary by jurisdiction

Can the bot accurately explain the process sequence?	5 / 5	
Can the bot clearly define key terminology?	3 / 3	
Can the bot ground the answer in the correct jurisdiction?	0 / 3	Needs regional specific information, example: case of LA wildfires, what specific jurisdictions does the user fall under?
Can the bot identify civic leverage points?	2 / 3	The response is about the functions of different bodies, not about how a person can relate to them. For example, you can contact your city councilor or file a zoning request.
Can the bot appropriately express uncertainty or variation?	0 / 1	Did not ask where do you live, because it should express uncertainty if it doesn't have knowledge of specific geographical information
Overall Score	14 / 20 = 70%	

Question #002

Category Information

Question #	Difficulty	Category	Subcategory
#002	Easy	Civic & Political Knowledge	Roles and authority in local government

Question and Bot Answer

Question	Bot Answer
A neighborhood association keeps hearing different officials referenced in discussions about a proposed project, and they are confused about who does what.	The bot described the city council/select board, planning board, zoning board of appeals, and building department. It explained that the city council/select board handles legislative decisions and major approvals, the planning board reviews development proposals and makes recommendations, the zoning board reviews variances and

Clarify the roles of key local government bodies involved in land use decisions and explain how authority is divided among them.	special permits, and the building department issues permits and ensures code compliance.
--	--

Rubric and Score

Rubric	Score	Peter Comment
Can the bot correctly identify institutional roles and authority?	4 / 5	As before, these are generic answers, and actual jurisdictions vary somewhat.
Can the bot accurately explain the process sequence?	5 / 5	
Can the bot clearly define key terminology?	3 / 3	
Can the bot ground the answer in the correct jurisdiction?	2 / 3	Maybe it can, but not clear from this example
Can the bot identify civic leverage points?	1 / 3	As before, the response is about what government does, not how we can relate to it.
Can the bot appropriately express uncertainty or variation?	0 / 1	It should acknowledge local variation more
Overall Score	15 / 20 = 75%	

Question #021

Category Information

Question #	Difficulty	Category	Subcategory
#021	Medium	Civic Information Access & Media Literacy	Finding official documents

Question and Bot Answer

Question	Bot Answer
----------	------------

A resident wants to follow a proposed policy change but doesn't know where to find official information like meeting agendas, minutes, or recordings. Typically, these materials are posted on the official website of the city or town government. Look for sections labeled "City Council," "Meetings," "Agendas," or "Public Records." You can also check local government social media pages or contact the city clerk's office directly for assistance in accessing these resources.	The bot advised the resident to check the city or town government website, especially sections labeled City Council, Meetings, Agendas, or Public Records. It also suggested checking local government social media pages, contacting the city clerk's office, and looking at local news outlets for coverage or links to official documents.
---	--

Rubric and Score

Rubric	Score	Peter Comment
Can the bot provide a clear pathway to primary sources?	3 / 5	The query already included the names of documents (such as agendas) so telling the person to search for those docs is not too useful. The more valuable question is where a proposed policy change would be noted on the website (if at all)
Can the bot evaluate source credibility?	4 / 5	
Can the bot recommend verification steps?	3 / 4	A proposed policy is more or less important depending on whether it has support, and the response does not talk about how to gauge support. I would look to newspaper coverage, and if there is none, I would talk with people who know people in government.
Can the bot help interpret civic documents?	3 / 3	
Can the bot suggest a system for tracking information?	1 / 2	I am not sure I would contact the city clerk. I would probably try to find individuals who are well connected
Can the bot avoid presenting unverified claims as facts?	1 / 1	

Overall Score	15 / 20 = 75%	
---------------	---------------	--

Question #041

Category Information

Question #	Difficulty	Category	Subcategory
#041	Medium	Formal Participation in Government Processes	Speaking at meetings

Question and Bot Answer

Question	Bot Answer
A resident wants to speak at a city council meeting about an upcoming decision but has never attended one before. Explain how they can sign up to speak, what rules they should expect (e.g., time limits, sign-up timing, decorum), and how to prepare for the logistics of participating.	The bot explained that the resident should check the meeting agenda, find sign-up instructions, note deadlines, understand time limits and decorum, prepare remarks, arrive early, bring materials if allowed, understand whether the meeting is in-person or virtual, and follow up with council members afterward.

Rubric and Score

Rubric	Score	Peter Comment
Can the bot identify the correct participation venue?	5 / 5	
Can the bot explain procedural rules and deadlines?	5 / 5	
Can the bot provide clear action steps?	4 / 4	
Can the bot identify decision-relevant evidence?	3 / 3	
Can the bot explain what happens after participation?	2 / 2	
Can the bot consider accessibility and barriers?	1 / 1	

Overall Score	20 / 20 = 100%	
---------------	----------------	--

Question #081

Category Information

Question #	Difficulty	Category	Subcategory
#081	Medium	Organizing & Associational Engagement	Finding and joining groups

Question and Bot Answer

Question	Bot Answer
A tenant recently affected by rising rents wants to get involved in local housing advocacy but is overwhelmed by the number of organizations online and isn't sure which are actually effective. Explain how they can identify relevant groups, evaluate their credibility and impact, and decide where to invest their time.	The bot suggested researching local organizations, checking community resources, reviewing missions and leadership, looking for success stories and testimonials, attending events, networking with advocates, reviewing financial transparency, evaluating engagement opportunities, starting small, and reflecting on personal advocacy goals.

Peter Overall Comment: This one seems less successful. I wonder if the bot should ask about the kind of organization the user wants, then search, and then offer to help interpret what is online about local organizations.

Rubric and Score

Rubric	Score	Peter Comment
Can the bot identify key stakeholders and power dynamics?	3 / 5	It's relying a lot on online materials. I would probably talk to people.

Can the bot propose a clear strategy and sequence of actions?	3 / 5	501(c)3 orgs must disclose financial information and bylaws. The bot could offer to find those and interpret them.
Can the bot include coalition-building or relationship strategies?	3 / 4	
Can the bot define group structure and roles?	1 / 3	
Can the bot address internal conflict or decision-making?	1 / 2	
Can the bot support leadership development or iteration?	1 / 1	
Overall Score	12 / 20 = 60%	

Question #101

Category Information

Question #	Difficulty	Category	Subcategory
#101	Medium	Community Problem-Solving & Public Work	Volunteering opportunities

Question and Bot Answer

Question	Bot Answer
A professional with limited free time wants to contribute to addressing food insecurity in their community but wants to ensure their time is used effectively.	The bot suggested identifying personal interests and skills, researching local food banks and nonprofits, checking impact reports, asking organizations about specific programs, looking for measurable outcomes, considering time commitment and flexibility, engaging

Explain how they can find meaningful volunteer opportunities and evaluate which ones have real impact versus symbolic involvement.	with the community, starting with a short-term commitment, and reflecting on impact after participating.
--	--

Rubric and Score

Rubric	Score	Peter Comment
Can the bot clearly define the problem and identify assets?	3 / 3	
Can the bot incorporate a co-production approach?	4 / 5	perhaps the answer should acknowledge that there may be no existing volunteer opportunities in the community and advise on creating such opportunities.
Can the bot provide a feasible implementation plan?	4 / 5	
Can the bot identify partners and required permissions?	3 / 3	
Can the bot consider safety and equity?	1 / 2	Not mentioned in the response
Can the bot include impact measurement or feedback?	2 / 2	
Overall Score	17 / 20 = 85%	

Question #121

Category Information

Question #	Difficulty	Category	Subcategory
#121	Medium	Relationships & Trust	Identifying relevant actors & networks

Question and Bot Answer

Question	Bot Answer
----------	------------

A community organizer is new to an issue and doesn't know who is already involved or connected behind the scenes. Explain how they can identify key people, groups, and institutions, and map how these actors are connected to each other.	The bot suggested conducting background research, using social media, engaging with community centers, attending meetings and events, using existing networks, creating a stakeholder list, mapping relationships, conducting informational interviews, using community asset mapping, and regularly updating the map.
---	---

Peter Overall Comment: This is a strong response. However, the bot offers many suggestions--perhaps so many that the result would be overwhelming

Rubric and Score

Rubric	Score	Peter Comment
Can the bot identify relevant relationships and gaps?	5 / 5	
Can the bot propose concrete relationship-building actions?	3 / 4	Yes, but a user would need to follow up to ask more about the specific strategies the bot suggests
Can the bot emphasize reciprocity and follow-through?	3 / 3	
Can the bot promote accountability and transparency?	3 / 4	The response doesn't specifically remind the user to be accountable and honest
Can the bot include marginalized or underrepresented groups?	2 / 2	
Can the bot consider boundaries and repair?	2 / 2	Again, this is not specifically addressed in the response
Overall Score	18 / 20 = 90%
